### Privacy Policy Review

Dear Parents/Guardians,

As a part of our efforts to make remote learning more engaging and interactive for your child, we are now going to be using Flipgrid. "Flipgrid is a website that allows teachers to create "grids" to facilitate video discussions. Each grid is like a message board where teachers can pose questions, called "topics," and their students can post video responses that appear in a tiled grid display."<sup>1</sup> We have done a review of Flipgrid's privacy policy and have gathered some helpful information for your review:

Where is your child's data stored?

- The information contained in the posting, including first name, last name, email address, and any audio and image included within any video will be stored in [Flipgrid's] Service.

Who has access to my child's data?

- Flipgrid shares personal information they collect on Users when Users create accounts, request support, record videos, share their experiences with us, or otherwise use the Service.
- Flipgrid may also share User personal information with vendors, consultants, and other third party service providers who need access to such information to carry out work on our behalf and at our direction.

How long does Flipgrid keep my child's data?

- When we delete personal information, it will be deleted from our active databases but may remain in our archives for up to 30 days.

How understandable is their EULA?

- The Flipgrid End User License Agreement is written in family friendly language and can be understood by most.

Would we be comfortable as a parent if our child used this?

- Yes, I would be comfortable if my child had to use Flipgrid in their classroom. The service complies with COPPA.
